Shelving, Racks,
Carts & Specialty Shelving

Vol. 24

Specifications

Stat Medical storage and handling equipment is uniquely designed to fit every storage application. The open wire truss-reinforced shelves permit light to penetrate, allow free air circulation and give greater visibility of merchandise. Moisture and dust accumulation is reduced and maximum effectiveness of sprinkler system is ensured. Assembly is simple. The heavy-duty tubular posts with rolled circular grooves at 1-inch increments are clearly numbered to make assembly exceptionally easy, fast and accurate. No tools are required for assembly or adjustment. The built-in tapered shelf collar mates perfectly with the inter-locking clip. The mating rib on the Stat Medical clip ensures a positive shelf position on the grooved post. A perfect fit every time!

Stat Medical Shelving has one of the highest load ratings on the market today. You asked for strong, heavy-duty
shelving at an affordable price and Stat Medical answered.

Static Load Capacity Guideline

Up to 48" wide: 1000 lbs. per shelf
Over 48" wide: 800 lbs. per shelf
Dunnage Shelving: 1,500 lbs. per shelf

Static load capacity is based on even distribution and can be affected by other conditions based on application – the above ratings are a guideline.
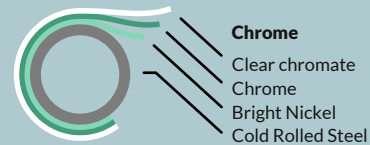

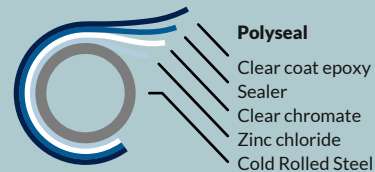

Mobile Load Capacity Guideline

Stat Medical 5" casters have a load capacity rating of 300 lbs. each. Mobile load capacities are application based – as a guideline, complete mobile units should not carry more
than 3 to 4 times the individual caster rating.

Tailored to Your Needs: Custom Shelving Solutions Available!

At Stat Medical, we understand that every space is unique, which is why we offer custom sizes and finishes to suit your specific requirements. Whether you need shelves to fit an unconventional space or crave a personalized touch with a distinct finish, we've got you covered.

Please note that while we strive for excellence in both craftsmanship and customization, extended lead times may apply for bespoke orders. Contact us today to discuss your vision, and let's bring your shelving dreams to life!

Stainless Steel
Type 304 series stainless steel.

Polyseal
Clear coat epoxy
Sealer
Clear chromate
Zinc chloride
Cold Rolled Steel

Chrome
Clear chromate
Chrome
Bright Nickel
Cold Rolled Steel

Epoxy
Silver epoxy
Phosphate coating
Cold Rolled Steel

Our shelving systems come in a variety of finishes. Choose the one that is best for your application and budget.

Stainless Steel

Crafted from 304 series stainless steel, this material stands as the pinnacle choice for a variety of applications, ensuring durability and sleek aesthetics.

Polyseal

Seeking unparalleled protection? Opt for our shelves featuring a Polyseal finish. With a clear epoxy powder coat applied electrostatically over a base of bright zinc-chromate electroplating, these shelves excel in various storage settings, including high-humidity environments like refrigeration. Enjoy extended longevity and corrosion resistance, backed by a limited 15-year corrosion warranty. Terms and conditions apply.

Chrome

Prioritizing aesthetics? Our chrome-finished units are a prime selection. Boasting a brilliant nickel-chrome electroplating, these shelves elevate visual appeal, making them ideal for dry storage and display applications. With these shelves, aesthetics truly shine, complemented by a one-year warranty.

Epoxy

Electrostatically applied, our Epoxy finish combines durability with versatility. Standard in black and available in various colors, these shelves offer a blend of reliability and affordability, backed by a three-year warranty from the date of manufacture.

The strongest shelf

Take a Load Off

With the unparalleled strength of Stat Medical's wire shelving.

1. Unlike some manufacturers, Stat Medical makes the connection. Stat Medical's trusses are always connected to the perimeter truss, which significantly reduces deflection and bowing in all standard shelf configurations.

2. Stat Medical provides more top mat wires than most competitors in the industry, resulting in a shelf with superior strength!

3. Support rods are foundational to the strength of any shelf, which is why Stat Medical only manufactures support rods that are thick, strong, and secure.

Competitors ● ● Stat

We Have Other Strengths, Too!

4. Numbered posts simplify the process of installation and ensure that shelves are assembled accurately the first time, every time.

5. Offering a complete line of shelving, Stat Medical is your one-stop supplier for any and all shelving needs. No need to source from multiple manufacturers!

6. Traditional hex post levellers have been replaced by an upgraded, non-marking leveller as part of our standard offering.

7. While some manufacturers may offer low grade, cheaper casters, these can greatly reduce shelf capacity and ruin flooring. High-capacity, non-marking polyurethane casters are our standard, as we refuse to compromise the quality or capacity of our shelving.

8. With our consistently high warehouse stock, you can bet that we will have what you need when you need it.

Myth

High-humidity environments like walk-in refrigerators or hothouses need green shelving to protect against rust and corrosion.

Fact

While many manufacturers market green shelving as the gold standard for humid environments, the green is purely cosmetic and was developed as nothing more than a visual aid to help users differentiate between shelving for humid environments and standard shelving. Because of this association, many have come to believe that they need green shelves in high-humidity environments and have even fallen victim to purchasing unsuitable shelving simply because the units were green.

When it comes to corrosion resistance, what really matters is the material that the shelves are comprised of, which is why our Polyseal shelves have four corrosion-fighting layers, including a unique zinc chromate undercoat that keeps our units free of rust and corrosion for years of intensive use. Why else would we offer a 15-year corrosion warranty?

Shelves

Wire Shelves

Stat Medical has the strongest shelf in the industry. Featuring connected trusses, thicker support wires, more wire per square foot of shelf.
A variety of sizes and finishes to choose from, plastic clips included.

Post

Stat Medical Shelf Posts, measuring 54" and above, are meticulously numbered for effortless identification. Each post is equipped with adjustable leveling bolts and a top post cap, ensuring versatile and stable shelf assembly. Crafted from durable one-inch round steel tubing, these posts feature grooves at one-inch increments, facilitating seamless and convenient setup.

In need of something custom? Contact us for custom post heights or custom epoxy colors.

Casters

Stem Casters

Polyurethane non-marking stem casters are designed to fit easily and securely into Stat Medical posts, adding mobility to stationary units. Each caster has a load rating of 300 lbs., ensuring reliable performance. Choose between threaded stem casters, suitable for even surfaces, and non-threaded stem casters, ideal for uneven surfaces, to meet your specific needs with confidence.

Chrome version available with minimum order quantity and extended lead time.

Shelves

Starter Unit

Start with a Stat Medical Starter Unit, comprising four numbered posts, four shelves, and plastic clips. Effortlessly transform these units into mobile carts by adding four polyurethane stem casters.

What sets Stat Medical apart? Unlike some manufacturers, Stat Medical makes the connection. Stat Medical's trusses are always connected to the perimeter truss, which significantly reduces deflection and bowing in all standard shelf configurations.

Load Capacity Per Shelf

Up to 48": 1000 lbs
Over 48": 800 lbs

Shelves

Add-On Unit

Expand your storage space effortlessly with Add-On Units. Each unit includes two posts, four shelves, plastic clips, and eight S-Hooks. The innovative S-Hook design eliminates the need to purchase two additional posts, making assembly simple and cost-effective.

Add-on S-hook Model No. TS-ADSH

Use Add-on S-hooks instead of posts to grow your shelving unit. Use two hooks for each Add-on wire shelf and use three hooks for Wide Span shelving.

Shelves

5-Tier Starter Unit

Maximize storage capacity within standard shelving footprint sizes with our 5-Tier Starter Units. Each unit comprises four numbered posts, five shelves, and plastic clips, providing ample storage space. Easily convert stationary Starter Units into mobile units by adding four polyurethane casters, available in threaded or non-threaded options, for enhanced versatility and convenience.

Add-on S-hook Model No. TS-ADSH

Use Add-on S-hooks instead of posts to grow your shelving unit. Use two hooks for each Add-on wire shelf and use three hooks for Wide Span shelving.

4-Tier Starter Unit with Dunnage Base

Designed to tackle heavy loads with ease, our Dunnage Shelving provides a robust solution for organizing your heaviest items. Each unit comes complete with four numbered posts, three standard wire shelves, a square tube dunnage shelf, and plastic clips, offering both strength and versatility. Choose the configuration that suits your needs - order with or without a dunnage mat. Whether in warehouses, industrial settings, or commercial kitchens, this versatile shelving system ensures stability and durability, keeping your space organized and efficient.
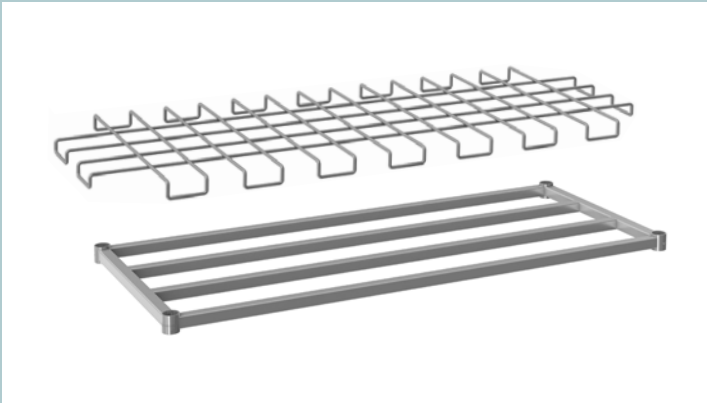

Dunnage Shelf and Mat can be added to any unit see page 10 for more information.

When placing your order, please be sure to include the -KIT suffix to the model number.

Storage & Security

Lockers

Constructed from heavy-duty 16 gauge steel with a durable painted grey finish, these lockers provide a reliable storage solution. They accept standard padlocks and feature adjustable legs. Available in four popular configurations, these lockers are shipped assembled for ease of use. Locks not included.

Wire Lockers

With six compartments hinged on the right and constructed from wire, these lockers offer ventilation to reduce odours while securely storing contents. The compartments ensure visibility for health and safety and are finished with Polyseal for durability and corrosion resistance.
